TAB173	Nordic cube side table	W45x40xH46cm	\$390

The oak wood used in these collections is proudly sourced from well managed forests in Europe. All piece is first slightly tinted with a water-based colour and then oiled. This combination gives the furniture a beautiful natural tone. The beauty of natural solid wood is highlighted by the careful selection of timbers with naturally occurring patterns & knots.

## DAILY CARE

Sponge with mild solution of water and natural soap (no aggressive soap). **Any stain should be removed immediately from the surface.** Oil treatment protects the oak wood against staining by most common fluids, but is **no guarantee against stains.**

## PREVENTIVE & REGULAR TREATMENT

Osmo liquid wax cleaner (or equivalent) can be applied to the timbers when the wood begins to feel dry. It will help to maintain the oiled surface, but is **no guarantee against stains.**

## REPAIRING TREATMENT

Two products (or equivalent) may be used: Osmo hardwax oil (natural matte) - applied to maintain original colour OR Osmo hardwax oil (natural white) - applied to lighten the wood vein. The stain or mark will need to be buffed from the surface prior to applying the oil. Both oils will restore the initial coating and seal the pores of the timber, creating a natural protection against everyday wear.

Follow the directions of any oil, wax or repair product carefully. This advice does not constitute a guarantee - always check with Papaya before beginning a repair process.

Nordic furniture pieces are certified by the Programme for the Endorsement of Forest Certification for responsible sourcing and management of timber sources.

Each piece is completed in a 'no energy to waste' process that eliminates waste to help protect our environment.
